BAY & BOW WINDOWS

**6000 Series
3-Lite Bay Window**
with Picture and
Casement windows
in White.

Bay and Bow windows feature real wood interior trim.

Breathe new life into any room and create a one-of-a-kind focal point with a beautiful 3-Lite Bay or 3-, 4- or 5-Lite Bow window from Window World. All styles feature outstanding craftsmanship and make any room feel larger and more airy.

Bay windows are created from three windows fixed together at 30- or 45-degree angles. Bow windows are a combination of three, four or five windows mulled at 10-degree angles. Both Bay and Bow windows can be created from Double-Hung, Picture and Casement window styles, and are built to custom size specifications. With fine details and advanced manufacturing to ensure they live up to our stringent reputation for outstanding quality, Window World's 6000 Series Bay and Bow windows are truly remarkable to say the least.

Features

- 1 Premium-grade hardwood plywood construction is strong and resilient.
- 2 Mullions (the pieces between each window unit) are constructed of strong engineered wood to help ensure the total unit remains in consistent alignment.
- 3 Continuous all-thread rods prevent warping and sagging.
- 4 Industry leading cable hanger system prevents the unit from slipping over time.
- 5 Real wood interior trim adds traditional richness.
- 6 Offset insulated sill design adds depth to the window unit's exterior appearance.

All-Thread Rod and Solid Wood Construction

Typically, the mullions on Bay and Bow windows (the pieces that join each window to the others) are made with hollow vinyl profiles with a rod running through them to hold the top part of the unit and the bottom part of the unit together. Or, they use ordinary wood strips to connect the top and bottom together. Window World's 6000 Bay and Bow windows are manufactured with mullions made of strong, engineered wood with a continuous all-thread rod running through the mullion itself. The combination of the engineered wood and the all thread rod ensures the window unit will not sag or warp over time.

Offset Insulated Sill Design

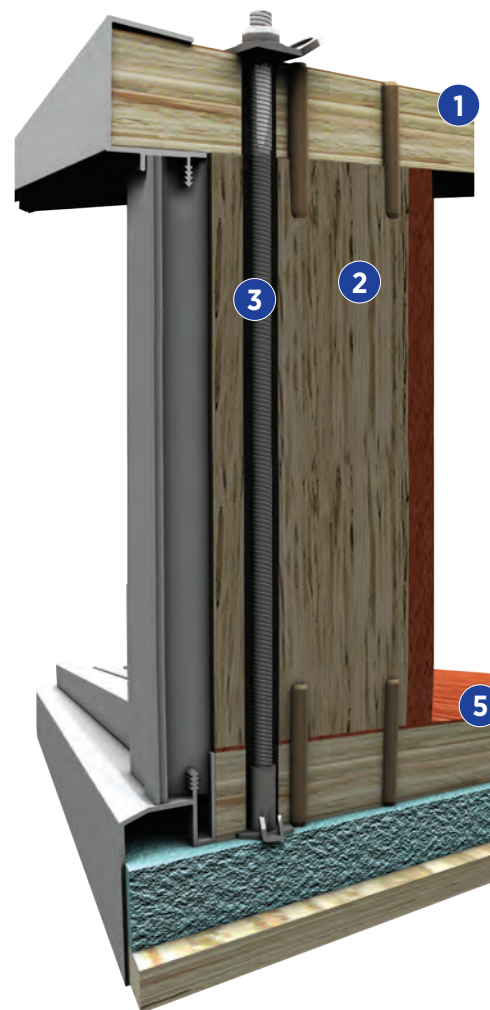

A 1-1/2" insulated panel is attached to the hardwood plywood seat board to create a 2-3/4" sill with a high R insulating value. The offset sill design creates an overhang that deflects water away from the window.

Exterior Knee Braces

Exterior knee braces add additional support and create a traditional exterior look.

Optional SolarZone® Glass

With optional SolarZone® Glass, 6000 Bay and Bow windows will have Low-E glass and Argon gas inside the insulating glass unit. Low-E glass helps keep heated air inside during colder months and air-conditioned air inside during warmer months. Argon gas is a non-toxic gas that is heavier than air. By replacing the air inside the insulating glass unit with Argon, Window World achieves higher insulating values and increased efficiency for its products.

Interior Stain Finishes

A selection of hand-applied stain finishes is available for wood frames, head and seat boards. All are factory applied to ensure the finishes are deep and even.

Interior Paint Colors

Wood frames, head and seat boards can also be painted in white, tan or clay. Rich colors are long-lasting and durable.

Laminated Interior Finishes

Wood frames, head and seat boards can be finished with laminate for increased durability.

Solid Surface Seat Boards

Waterproof, 1/2" thick solid surface seat boards are also available in six colors.

Recessed Lighting

Available in three colors, recessed lighting can either be hard-wired or have a plug-in application. LED bulb options are also available.

Interior Trim Packages

Choose from five trim packages. Each is available in your choice of stains.
