6000 SERIES

CASEMENT & AWNING WINDOWS

6000 Series
Casement Windows
in White.

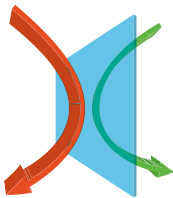

A single lever locks the window at multiple points.

Window World’s 6000 Series Casement and Awning windows are a beautiful alternative to other operable window styles. Unobstructed glass areas welcome more light into the home, and multiple design features and warm-edge glass technology ensure dependable performance.

Casement windows operate with a streamlined lever that opens the window to a full 90-degrees, and allows the exterior glass to be cleaned from inside of the home. Popular as standalone units, or in other configurations like in a Bay or Bow window, Casement windows are secured at multiple points with a single lever. Awning windows have locks on either side of the frame, and open from the bottom. Both are backed by our comprehensive warranty ensuring hardware operates efficiently and effectively, year in and year out.

SolarZone™

Window World 6000 Series SolarZone insulated glass packages with Low-E and Argon glass help you save on heating and cooling costs while also keeping your home more comfortable. During colder months, SolarZone provides thermal protection to keep heated air inside. While during warmer months, SolarZone reduces solar heat gain, lowering the inside glass temperature and helping your home stay cool.

ENERGY EFFICIENT PERFORMANCE				
CASEMENT	U-FACTOR	SHGC	R-VALUE	VT
SolarZone™	0.03	0.19	3.86	0.40
SolarZone™ Elite	0.22	0.18	4.45	0.37
AWNING	U-FACTOR	SHGC	R-VALUE	VT
SolarZone™	0.26	0.19	3.83	0.40
SolarZone™ Elite	0.23	0.18	4.35	0.37

SolarZone™: Adding SolarZone™, which includes Low-E and Argon inside the insulating glass unit, helps keep homes warmer in winter and cooler in summer, and also blocks UV rays that fade furnishings.

Values based on Double-Strength glass with SolarZone™ without grids. Other options (Obscure or Tinted glass) available upon request.

Features

- 1 Frames and sash are made from premium quality vinyl and are welded at mitered corners for exceptional strength and longevity.
- 2 Frame profiles feature internal divided chambers for added strength and enhanced thermal performance. (Not shown.)
- 3 Double-strength, 3/4" insulating glass units feature SolarZone™ glass for enhanced thermal efficiency.
- 4 Operators utilize a sealable housing to reduce potential for air and water infiltration.
- 5 Concealed multi-point lock system with a zippered locking effect ensures engagement of top lock point. The folding operator handle nests to minimize interference with window treatments.
- 6 Heavy-gauge steel hinges allow exterior glass pane to be cleaned from inside the home, and open the window to almost 90 degrees for maximum ventilation.
- 7 Triple weatherstripping around sash guards against air infiltration.

Awning windows feature two locks.

Nesting Handles

Casement and Awning operators provide easy opening and closing – as the handle is turned, the sash moves accordingly. When not in use, the handle nests (folds) into itself creating a streamlined appearance. In addition, because the handle tucks away, it minimizes the potential for interference with window treatments.

No Fade Vinyl Colors

6000 Series windows are available in three extruded colors to blend with virtually any home exterior color palette. The color is molded through the vinyl material so it will not fade or discolor over time.

Exterior Laminate Colors

Expanding your design options, 6000 Series windows are also available in six additional exterior colors. See limitations listed below for detail.

Interior Woodgrain Options

6000 Series windows offer five optional woodgrain laminate choices. Not all woodgrains available with all exterior laminate colors. See limitations listed below for detail.

Privacy & Tinted Glass

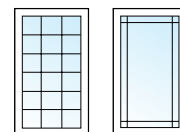

Choose from two shades of optional tinted glass or from three popular patterns of privacy glass. While tinted glass does not decrease visibility, privacy glass reduces clear visibility while allowing light to pass through.

Hardware

Hardware is color matched to your window as a standard feature. Optional plated hardware is also available in four finishes - Satin Nickel, Bright Brass, Antique Brass and Bronze.

Grids

Optional contoured grids are available in two popular patterns. They can be placed on the exterior side of the glass to create a Simulated Divided Lite (SDL), or inside the glass unit to provide a smooth cleaning surface.

Colonial

Perimeter

Limitations: Not all exterior colors available with all interior options. Bronze, Brown, and Black exterior laminates require a three-week lead time. Hunter Green, Earthtone, and Silver require a six-week lead time. Grids are available in all colors, but not all exterior grid colors available with all interior colors. Contact your sales representative for more detail.
