6000 SERIES

PATIO DOORS

6000 Series
Patio Doors
in White.

Transoms and sidelites are available to complement existing configurations.

Expand living spaces and welcome the outdoors in with Window World's 6000 Series Patio Doors. Elegant design combines with strategic features to ensure long-lasting trouble-free operation, and a multitude of options allows you to create the perfect look for your home.

Available in both two-panel and three-panel configurations, Window World's 6000 Series Patio Doors are the perfect combination of form, function, and style. Featuring streamlined profiles, large glass areas, heavy-duty aluminum screen frames, and door panels that glide with a fingertip on a tandem nylon roller system, enhancing your home's beauty while protecting against inclement weather.

Optional Blinds-Between-the-Glass

Internal, hermetically-sealed mini blinds add privacy and security, while helping control light and solar heat gain. Because they are located inside the sealed glass unit, the blinds will never need dusting and will not become damaged over time. The blinds raise, lower, and tilt with a single handle and are available in a variety of colors.

White

Clay

Espresso

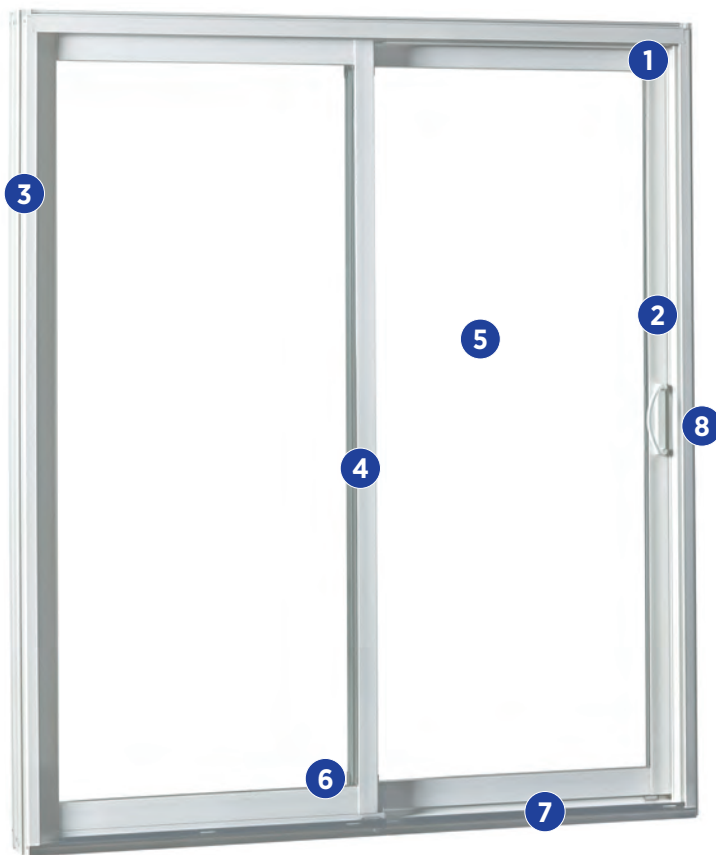

Slate Grey

Silver Moon

Limitations: Internal Blinds are not available with Triple Pane Glass or Grids. Please contact your Window World design consultant for more details.

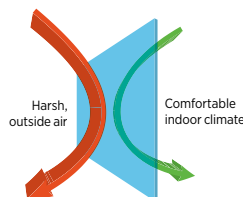

Features

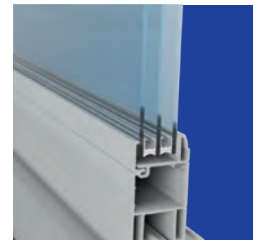

- 1 Fusion-welded mitered sash panels keep out air and water.
- 2 Sash profiles are reinforced with steel for additional strength.
- 3 Energy-efficient extrusions utilize separate chambers that form pockets of air to insulate and provide additional thermal protection.
- 4 Multiple door weatherstripping reduces air infiltration, saving energy, and protecting your homes interior comfort.
- 5 Standard all-tempered glass increases strength and safety. Available SolarZone® glass packages add additional thermal barriers to keep your homes temperature stable.
- 6 Interlock engagement of the fixed and operable panels create a seal between the panels to keep out harsh weather and increases forced-entry resistance.
- 7 Lower sill design provides safer entry and exit.
- 8 Multi-point locking mechanism provides optimum resistance to forced entry.

SolarZone®

Window World 6000 Series SolarZone® insulated glass packages with Low-E and Argon glass helps you save on heating and cooling costs while also keeping your home more comfortable. During colder months, SolarZone® provides thermal protection to keep heated air inside. While during warmer months, SolarZone® reduces solar heat gain, lowering the inside glass temperature and helping your home stay cool. SolarZone® SF and TG2 Glass packages offer additional thermal performance to meet even the toughest energy-saving requirements.

Optional heavy-duty footbolt is an added security measure that can be used in the vent mode to prevent the door from opening any more than three inches, or in fully closed/lock mode it complements the multipoint locking system with additional protection against forced entry.

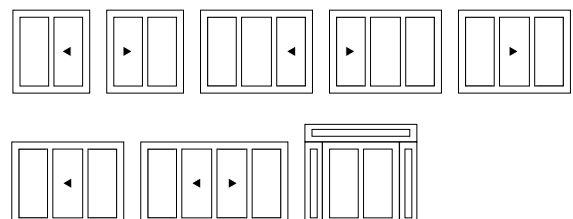

Optional TG2 Triple Pane Glass Package increases thermal efficiency with airtight glass chambers and double Low-E coatings applied to two glass surfaces, to keep your home's temperatures even and comfortable year round.

ENERGY EFFICIENT PERFORMANCE

PATIO DOORS	U-FACTOR	SHGC	R-VALUE	VT
Clear Glass	0.44	0.57	2.25	0.6
SolarZone®	0.28	0.20	3.52	0.47

*Black hardware standard with Black interior and Black Exterior.

Interior Colors

6000 Series Patio Doors are available in three extruded colors to blend with virtually any home exterior color palette. The color is molded through the vinyl material so it will not fade or discolor over time. In addition to White, Tan, and Clay extruded colors, Black interior laminate also available.

Interior Woodgrains

6000 Series Patio Doors offer four optional woodgrain laminate choices. Not all woodgrains available with all exterior laminate colors. Please contact your Window World design consultant for more information.

Exterior Finish Colors

Expanding your design options, 6000 Series Patio Doors are also available in five additional exterior colors. Each color is available with all vinyl interior colors. The color coating is applied in a controlled factory environment to ensure a smooth, even finish and is covered under the manufacturer's comprehensive warranty.

Privacy & Tinted Glass

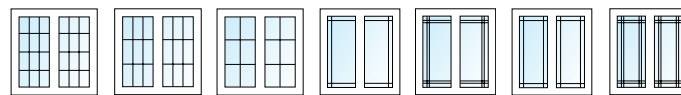

Choose from two shades of optional tinted glass or from two popular patterns of privacy glass. While tinted glass does not decrease visibility, privacy glass reduces clear visibility, and allows light to pass through.

Hardware

Hardware is color matched to the interior patio door color as a standard feature. Optional plated hardware is also available in four finishes.

Grids

Optional 5/8" flat or contoured grid is available in Colonial Prairie and Perimeter. Colonial grids can be designed with your choice of the number of lites per panel to give your door the look you desire. Grids can be ordered to match exterior finish colors.

Colonial 12L Colonial 9L Colonial 6L Perimeter Double Perimeter Prairie Double Prairie

Limitations: Not all interior/exterior colors and grid combinations available. Contact your Window World design consultant for more details.
