6000 SERIES

CASEMENT & AWNING WINDOWS

6000 Series Casement Windows in White.

A single lever locks the window at multiple points.

Window World's 6000 Series Casement and Awning windows are a beautiful alternative to other operable window styles. Unobstructed glass areas welcome more light into the home, and multiple design features and warm-edge glass technology ensure dependable performance.

Casement windows operate with a streamlined lever that opens the window to a full 90-degrees, and allows the exterior glass to be cleaned from inside of the home. Popular as standalone units, or in other configurations like in a Bay or Bow window, Casement windows are secured at multiple points with a single lever. Awning windows have locks on either side of the frame, and open from the bottom. Both are backed by our comprehensive warranty ensuring hardware operates efficiently and effectively, year in and year out.

Nesting Handles

Casement and Awning operators provide easy opening and closing - as the handle is turned, the sash moves accordingly. When not in use, the handle nests (folds) into itself creating a streamlined appearance. In addition, because the handle tucks away, it minimizes the potential for interference with window treatments.

Features

- 1 Frames and sash are made from premium quality vinyl and are welded at mitered corners for exceptional strength and longevity.
- 2 Frame profiles feature internal divided chambers for added strength and enhanced thermal performance.
- 3 Double-strength, 3/4" insulating glass units feature SolarZone™ glass for enhanced thermal efficiency.
- 4 Operators utilize a sealable housing to reduce potential for air and water infiltration.
- 5 Concealed multi-point lock system with a zippered locking effect ensures engagement of top lock point. The folding operator handle nests to minimize interference with window treatments.
- 6 Heavy-gauge steel hinges allow exterior glass pane to be cleaned from inside the home, and open the window to almost 90 degrees for maximum ventilation.
- 7 Triple weatherstripping around sash guards against air infiltration.

SolarZone®

Window World 6000 Series SolarZone insulated glass packages with Low-E and Argon glass help you save on heating and cooling costs while also keeping your home more comfortable. During colder months, SolarZone provides thermal protection to keep heated air inside. While during warmer months, SolarZone reduces solar heat gain, lowering the inside glass temperature and helping your home stay cool.

SolarZone® TG2 Triple-pane Glass Package Option

In addition to excellent energy efficiency year round, triple-pane glass also provides added security, noise reduction, and reduces condensation build-up. Contact your Window World design consultant for more details.

ENERGY EFFICIENT PERFORMANCE				
CASEMENT	U-FACTOR	SHGC	R-VALUE	VT
Clear Glass	0.41	0.50	2.44	0.53
SolarZone®	0.26	0.18	3.85	0.42
SolarZone® SF (Optional)	0.23	0.18	4.35	0.41
SolarZone® TG2 (Optional)	0.21	0.16	4.76	0.30
AWNING	U-FACTOR	SHGC	R-VALUE	VT
Clear Glass	0.42	0.50	2.38	0.53
SolarZone®	0.26	0.18	3.85	0.42
SolarZone® SF (Optional)	0.23	0.18	4.35	0.41
SolarZone® TG2 (Optional)	0.21	0.16	4.76	0.30

SolarZone®: Double-Strength Argon filled glass with spectrally selective coating on surface 2.
SolarZone® SF: Double-Strength Argon filled glass with spectrally selective coatings located on surfaces 2 & 4.
SolarZone® TG2: 3-panes of Double-Strength Argon filled glass with spectrally selective coatings located on surfaces 2 & 5.
 Values based on Double-Strength glass with SolarZone™ without grids. Other glass options available upon request.

Window World

Interior Colors

White Tan Clay Black*

*Black interior available in laminate only.

Interior Woodgrains

White Oak Light Oak Dark Oak Cherry

Exterior Laminate Colors

Bronze Brown Black Earthtone

Hunter Green Silver

Privacy Glass

Obscure

Rain

Tinted Glass

Tinted Grey

Tinted Bronze

Hardware

White Tan Clay Bright Brass

Antique Brass Bronze Satin Nickel

Interior Colors

6000 Series windows are available in three extruded colors to blend with virtually any home exterior color palette. The color is molded through the vinyl material so it will not fade or discolor over time. In addition to White, Tan, and Clay extruded colors, Black interior laminate also available.

Interior Woodgrain Options

6000 Series windows offer four optional woodgrain laminate choices. Not all woodgrains available with all exterior laminate colors. See limitations listed below for detail.

Exterior Laminate Colors

Expanding your design options, 6000 Series windows are also available in six additional exterior colors. See limitations listed below for detail.

Privacy & Tinted Glass

Choose from two shades of optional tinted glass or from two popular patterns of privacy glass. While tinted glass does not decrease visibility, privacy glass reduces clear visibility while allowing light to pass through.

Hardware

Hardware is color matched to your window as a standard feature. Optional plated hardware is also available in four finishes - Satin Nickel, Bright Brass, Antique Brass and Bronze.

Grids

Optional contoured grids are available in two popular patterns. They can be placed on the exterior side of the glass to create a Simulated Divided Lite (SDL), or inside the glass unit to provide a smooth cleaning surface.

Colonial Perimeter

Limitations: Exterior colored laminates require additional lead time. Not all interior/exterior colors and grid combinations available. Grids are available in all colors, but not all exterior grid colors available with all interior colors. Contact your Window World design consultant for more details.

*Restrictions may apply. For complete details, see the warranty at your nearest Window World store.
