Improving Homes. Changing Lives.®

PREMIER COLLECTION

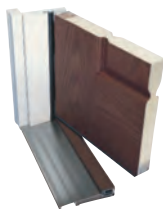

STANDARD FEATURES

3 Panel Craftsman Door
in Oak Grain texture and
Mahogany stain with Full
Sidelites. Addison lever and
deadbolt in Satin Nickel.

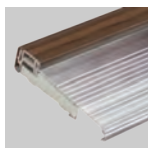

Insulated Core

Entry systems feature an environmentally-friendly insulation to provide a high R-value for maximum thermal protection.

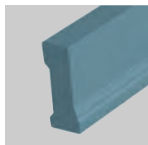

Advanced Sill Design

The sill's innovative design prevents rotting, warping, or deterioration over time. Incorporating a high dam overlap cap in addition to the 1-3/8" sill height creates a tough barrier against water penetration. Door sills are available in mill finish, satin nickel, and bronze.

Rot-Free Brickmould

Brickmould is constructed of a durable composite material to resist rot, decay, and damage from insects.

Security Strike Plate

Where applicable, a steel security strike plate adds extra reliability to increase the strength of the deadbolt.

Security Protection

Grade 1 is the highest level of security for residential deadbolts. All deadbolts have Grade 1 certification.

Dust Box

The dust box, located beneath the deadbolt strike, provides a barrier to air infiltration and also conceals the deadbolt latch.

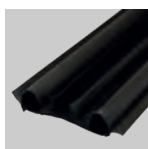

Ball Bearing Hinges

Ball bearing hinges are standard for inswing doors – featuring four-point attachments to the door and the door frame for a lifetime of dependability.

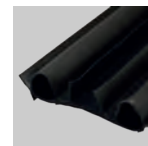

Door Bottom Sweep

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

Door Bottom Sweep

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

Weathertight Seal

Energy-efficient weatherstripping provides a weathertight seal along the sides and top of the door frame. It also interlocks with the unique corner pad ensuring the most energy-efficient seal available for keeping moisture, air, and dirt out of your home.

Doorlite Frame

High-performance doorlite frames are heat-resistant and will not warp, crack, or fail to adhere to the door, even in the most intense climates.

Doorlites

Doorlites add beauty, natural light, and curb appeal to your home, but can also answer your specific needs for light control, privacy, and outdoor visibility. Handcrafted decorative glass is individually unique – no two are ever alike.

Pre-mitered Casing

Ready-to-install casing is available for any door configuration including transoms and comes in all paint and stain finishes. Standard clear Poplar 2-1/2" Ranch or Colonial style casing covers paint lines for a finished appearance. 3-1/2" Oak casing also available.

Hardware

- 100% forged brass construction offers superior strength.
- Nickel silver keys and cylinder pins ensure strength, durability, and reliable operation.
- 1/2" deadlatch throw with plunger that prevents latch 'force-back.'
- Heavy-duty springs ensure levers won't droop over time.
- Pick-resistant T-pins make picking virtually impossible.
- Maximum security deadbolts add protection (ANSI Grade 1).
- Lifetime mechanical and 10-year tarnish warranty available.

PREMIER COLLECTION

QUALITY CONSTRUCTION

Full Lite 1L Door
in Oak Grain texture and Natural Oak
stain and Vapor Privacy Glass.
Georgian knob and deadbolt in Bronze.

Patented *SHIELD*⁶ Technology

Window World's *SHIELD*⁶ Technology means your entry doors are protected from water penetration on all six sides. On the sides of the doors, full-length composite stiles meet top and bottom rails also created from composite material to ensure moisture does not get inside the door unit. Both the front and back of the door feature waterproof, fiberglass reinforced door skins to seal the unit completely.

1 Full-Length Composite Stiles

Entry doors feature full composite stiles to help prevent against water infiltration and full-length Laminated Veneer Lumber (LVL), stronger than wood, to ensure the door will perform as designed.

2 Fiberglass Reinforced Skin

Fiberglass holds up to the wear and tear of everyday use and is unaffected by moisture and humidity. In addition, the fiberglass material resists rot, splintering, and warping like wood, and will not dent or delaminate like steel.

3 Insulated Core

Environmentally-friendly insulation provides a high R-value for maximum thermal protection.

4 Composite Top and Bottom Rails

In addition to being waterproof, the strong composite material also resists mold, mildew, and rot.

Rotted, Traditional Frame

Rot-Resistant Composite Frame

PREMIER COLLECTION

FRENCH DOORS & PATIO DOORS

Full Lite French Doors

96" Full Lite French Doors in Oak Grain texture with Mahogany Stain with Misty glass. Eclipse handleset in Brass.

All entry doors are available as French double doors to make a grand entrance even grander.

When ordered in a French double door style, one of the door panels feature an attached astragal. The astragal has durable steel locking pins at the sill and at the entry door's head. When locked, the astragal keeps one entry system panel locked in place while allowing the other door panel to open and close. With the astragal unlocked, both door panels open and close freely.

On French double door systems, astragals are locked and unlocked with fingertip adjustments.

French doors are unavailable with screens.

2 Panel Patio Door

in Smooth White with Classic Glass. Accent lever in Satin Nickel.

Patio doors are available in two panel or three panel styles with both decorative and classic glass styles.

On two panel patio doors, one panel is operational while the other remains fixed. On three panel patio doors, two panels remain fixed while the third panel is fully operational. The operational panel on patio doors can open into your home or open to the outside. A durable sliding track fiberglass mesh screen comes standard in five popular colors for doors opening into the home. In addition, patio doors are available with any decorative glass patterns or classic glass options that fit Full Lite door styles shown on the following pages.

PREMIER COLLECTION

OPERATING SIDELITES

**2 Panel 3/4 Lite Door
& Operating 3/4 Sidelite**
in Oak Grain texture with Rain Privacy
Glass in Mesa Red. Camelot handleset
and deadbolt in Aged Bronze.

When a single door is too small, and a double door is too big, an operating sidelite is the perfect solution.

Functioning just like a true French double door, doors with an operating sidelite feature a continuous sill. The sidelite and the door both feature durable ball bearing hinges to maintain a lifetime of perfect alignment. An astragal attached to the sidelite allows it to remain either locked and fixed or unlocked and moving freely. Operating sidelites are available in decorative and classic glass styles and can open into the home or to the outside. Full Lite, 3/4 Lite, and 1/2 Lite sidelites are available as operating sidelites in both 12" and 14" widths.

- Inswing or outswing.
- Operates like a French double door.
- Ball-bearing hinges ensure perfect alignment.
- Continuous sill across both door and sidelite.
- Any available sidelite can become Operating.

Limitations

Standard 6/8 heights. Limited custom heights (8/0 not available).
Screens not available.
